Zomato Restaurant Data Analysis

Presented by

Saket Jha

zomato

Objective

To analyze restaurant data and extract meaningful business insights.

Dataset

Zomato Restaurant Dataset

Analysis

Cleaning, Processing, Exploratory Data Analysis & Visualization

Outcome

Actionable insights to support better business decisions.

Tools Used

Excel (Power Query, Pivot Table, Charts)

Presented by

zomato

Problem Statement

Business Problem

Zomato wants to expand its restaurant network and improve market presence in high-potential locations. However, opening new restaurants without proper analysis can lead to low customer engagement, poor sales, and high operational costs.

The company faces challenges such as:

- Identifying the best locations for expansion
- Understanding customer preferences and food trends
- Analyzing restaurant ratings, pricing, and demand
- Studying competition in different cities/areas
- Improving customer satisfaction and delivery performance

Short Version

Problem Statement:

To analyze Zomato restaurant data and identify suitable business locations, customer preferences, pricing trends, and competitive factors in order to support strategic restaurant expansion decisions.

zomato

good
food
good
mood

Key Challenges

Location Selection

Identify the best locations with high demand potential.

Customer Preferences

Understand customer taste, behavior, and food trends.

Rating Analysis

Analyze ratings and reviews to ensure quality & satisfaction.

Business Expansion

Make data-driven decisions for successful restaurant expansion.

THE HISTORY OF ZOMATO:

Evolution of a Food Tech Giant

2008

FOUNDATION (As Foodiebay)

Started by Deepinder Goyal and Pankaj Chaddah as a restaurant listing website under the name **Foodiebay**.

2010

REBRANDING & EXPANSION

Rebranded to **Zomato**.
Expanded operations across major Indian cities.

2012

INTERNATIONAL & DELIVERY

Launched online food delivery services.
Expanded internationally (e.g., Dubai, UAE).

2015

MAJOR GROWTH & ACQUISITIONS

Rapid growth through key acquisitions and new services like table reservations.

2021

INITIAL PUBLIC OFFERING (IPO)

Successfully listed on Indian stock exchanges, becoming a public company.

PRESENT

DIVERSIFICATION & SUSTAINABILITY

Focus on B2B supplies (Hyperpure), drone delivery trials, and eco-friendly initiatives for a sustainable future.

OUR JOURNEY

From a simple restaurant listing website to a global food tech platform transforming the way people discover, order, and experience food.

MISSION

To better the lives of people by helping them discover the best food options.

VISION

To be the world's most trusted and innovative food tech brand.

IMPACT

Millions of restaurants, delivery partners, and customers connected across multiple countries every day.

zomato

HOW ZOMATO WORKS:

YOUR FOOD JOURNEY

1

EXPLORE & FIND RESTAURANTS

Customer browses thousands of nearby restaurants and cuisines.

2

PLACE SECURE ORDER

Dishes are selected, and secure payment is processed on the app.

3

RESTAURANT PREPARES FOOD

Restaurant receives the order and prepares fresh food.

4

DELIVERY PARTNER ASSIGNED

A nearby delivery driver is instantly assigned for pickup.

5

REAL-TIME TRACKING

Track food live from the kitchen to your doorstep.

6

HOT FOOD DELIVERED

Order arrives hot and fresh. Enjoy your delicious meal!

Wide Choice

Explore a variety of restaurants and cuisines near you.

Safe & Secure

100% secure payments and data protection.

Real-Time Updates

Live tracking keeps you updated at every step.

Fast Delivery

Quick and reliable delivery to your doorstep.

Great Experience

Delicious food, delivered with care.

zomato

#		COLUMN NAME	DESCRIPTION
1		RestaurantID	Unique identifier for each restaurant in the dataset.
2		RestaurantName	Name of the restaurant.
3		CountryCode	Code of the country (e.g., 1 for India) where the restaurant is located.
4		City	City where the restaurant is located.
5		Address	Complete address of the restaurant.
6		Locality	Specific area or neighborhood where the restaurant is located.
7		LocalityVerbose	Detailed locality description (area, landmark, or nearby place).
8		Longitude	Geographical longitude coordinate of the restaurant location.
9		Latitude	Geographical latitude coordinate of the restaurant location.
10		Cuisines	Types of cuisines served by the restaurant.
11		Has_Table_booking	Indicates whether the restaurant provides table booking facility online. (Yes / No)

#		COLUMN NAME	DESCRIPTION
12		Has_Online_delivery	Indicates whether the restaurant offers online delivery service. (Yes / No)
13		Is_delivering_now	Indicates whether the restaurant is currently delivering orders. (Yes / No)
14		Switch_to_order_menu	Indicates if the restaurant has switched to order-only menu (no dine-in). (Yes / No)
15		Currency	Currency in which the restaurant operates (e.g., INR, USD, etc.).
16		Price_range	Price range category of the restaurant (1 to 4) indicating affordability.
17		Votes	Total number of votes/ratings received from users.
18		Rating	Average rating of the restaurant based on user reviews (out of 5).
19		Datekey_Opening	Date (key) when the restaurant was added or opened in the platform.
20		Country Name (Key)	Key value that maps to the country name.
21		Country Name	Full country name where the restaurant is located.
22		Average_cost_for_two_with_currency	Average cost for two people (including tax) with currency.

APPROACH		DESCRIPTION	TOOLS / FUNCTIONS USED
01		Data Cleaning Cleaned the raw dataset by removing duplicate values, fixing formatting issues, and handling missing or inconsistent data to improve data quality and accuracy.	• TRIM • CLEAN • Remove Duplicates • Find & Replace 
02		Data Enrichment Enhanced the dataset by combining additional information from external sources and creating meaningful business-related attributes.	• VLOOKUP • XLOOKUP • IF Function 
03		Descriptive Analysis Performed statistical and summary analysis to understand restaurant trends, customer ratings, pricing patterns, and service availability.	• Pivot Tables • COUNTIF • SUMIF • AVERAGEIF 
04		Trend Analysis Analyzed trends related to restaurant ratings, delivery services, pricing, and customer engagement across different cities and cuisines.	• TREND • FORECAST • Charts • Conditional Formatting 
05		Customer Segmentation Categorized restaurants and customers based on cuisine preferences, ratings, cost, and delivery options for better business understanding.	• SORT • FILTER • Slicers 
06		Visualization Created interactive dashboards and charts to visually represent insights and support better business decision-making.	• Charts • Pivot Charts • Dashboards • Slicers

INSIGHT
Positive factors
drive better ratings

IMPACT OF TABLE BOOKING ON RATINGS

Restaurants offering table booking have a higher average rating of **3.48** compared to **2.81** for those that do not.

IMPACT OF ONLINE DELIVERY ON RATINGS

Restaurants offering online delivery have a higher average rating of **3.29** compared to **2.75** for those that do not.

KEY TAKEAWAYS

Table booking positively impacts customer ratings, increasing the average by **0.67** points.

Online delivery also improves ratings, with an increase of **0.54** points.

Both factors contribute to better customer experience and higher satisfaction.

Focus on enabling table booking and online delivery to drive ratings and customer loyalty.

1. GEOGRAPHIC EXPANSION & MARKET FOCUS

Prioritize High-Growth Markets

Focus on markets showing strong growth in restaurant openings, such as India, United States, and Brazil, to expand presence and partnerships.

Strengthen Presence in Leading Markets

India leads with the highest number of restaurants. Deepen engagement with restaurants and users in this key market.

Explore Emerging Opportunities

Invest in emerging markets like South Africa, New Zealand, Turkey, and Indonesia where growth potential is high but competition is lower.

Increase Penetration in Tier 2 & Tier 3 Cities

Expand beyond metros to smaller cities where restaurant openings are rising steadily.

EXPECTED IMPACT

Increased market share in high-growth regions

Stronger network of restaurants and users

Early-mover advantage in emerging markets

Sustainable long-term revenue growth

2. RESTAURANT & CUISINE STRATEGY

Promote Top Cuisines

North Indian, North Indian-Chinese, Chinese, and Fast Food are the most popular. Use targeted campaigns, offers, and collections to boost discovery and orders.

Support Niche & Underserved Cuisines

Encourage cuisines like Street Food, Bakery, Desserts, and Café by running promotions and increasing visibility on the platform.

Enable Restaurant Diversity

Onboard a wider variety of cuisines in underrepresented areas to cater to local preferences and increase user satisfaction.

Help Restaurants Improve Quality

Provide training, best practices, and tools to help restaurants maintain high quality and consistency.

Expected Outcome

Stronger restaurant engagement, higher discoverability, and improved customer satisfaction across diverse tastes.

FOCUS AREA

Expand smartly, promote what's popular, support innovation, and empower restaurants to deliver exceptional experiences.

3. CUSTOMER EXPERIENCE ENHANCEMENT

Boost Table Booking Adoption

Restaurants offering table booking have higher ratings. Promote table booking through in-app nudges, exclusive discounts, and easy booking experiences.

Strengthen Online Delivery Experience

Online delivery significantly improves ratings. Invest in faster delivery, real-time tracking, and reliable service.

Focus on Rated Restaurants

Higher-rated restaurants perform better. Highlight top-rated restaurants with badges, reviews, and better placement.

Encourage More Reviews

Motivate customers to leave reviews and ratings through reminders, loyalty points, and incentives to increase platform credibility.

4. OPTIMIZE COST & VALUE PERCEPTION

Optimize Pricing for Affordability

Monitor average cost across countries and ensure value-for-money offerings to attract price-sensitive customers.

Leverage Cost Insights for Promotions

Use cost benchmarks to design location-specific offers and combo deals that maximize order value.

Promote Affordable Dining Options

Highlight affordable restaurants and cuisines to increase accessibility and order frequency.

Dynamic Pricing & Offers

Implement dynamic offers based on demand, location, and user behavior to drive conversions.

EXPECTED IMPACT

Improved affordability and value perception

Higher order value and frequency

Better conversion through targeted offers

Stronger customer retention

5. GROWTH & PARTNERSHIP STRATEGY

Strengthen Restaurant Partnerships

Build long-term partnerships by offering growth tools, marketing support, and performance insights.

Data-Driven Expansion

Use data on restaurant openings, cuisine popularity, rating impact, and cost trends to identify high-potential areas and categories.

Target High-Impact Categories

Focus on categories and services (like table booking and delivery) that have proven to improve customer ratings and satisfaction.

Build Loyalty Programs

Introduce and enhance loyalty programs for both customers and restaurant partners to drive retention and repeat usage.

EXPECTED IMPACT

Sustainable restaurant network growth

Data-led smarter expansion

Higher customer satisfaction

Stronger loyalty and repeat engagement

6. PERFORMANCE & MONITORING

Track Key Metrics Continuously

Monitor ratings, restaurant growth, cuisine performance, cost trends, and feature adoption to measure impact.

Benchmark & Set Targets

Benchmark against top-performing countries, cuisines, and services. Set clear targets for ratings and growth.

Act on Customer Feedback

Analyze feedback and reviews to identify pain points and improve customer experience consistently.

Regular Performance Reviews

Conduct regular reviews with stakeholders and restaurant partners to align strategies and ensure continuous improvement.

EXPECTED IMPACT

Data-driven decision making

Consistent performance improvement

Better customer experience

Accountability and strategy alignment

OVERALL STRATEGIC GOAL

Drive sustainable growth by expanding in high-potential markets, promoting popular cuisines, enhancing key services like table booking and online delivery, optimizing cost strategies, and continuously improving customer satisfaction.

KEY IMPACT

Higher Growth

Better Ratings

Increased Loyalty

Improved Profitability

Stronger Ecosystem

KEY FINDINGS

Steady Restaurant Growth:

Overall growth with a dip between 2012-2016 and a strong rebound in 2017-2018.

Average Ratings are Moderate:

Overall average rating is 2.89, indicating room for improvement in customer satisfaction.

Cuisine Preferences:

North Indian is the most popular cuisine, followed by Chinese and Fast Food.

Geography Matters:

Philippines, Indonesia & UAE have higher ratings; India lags behind.

Delivery Drives Satisfaction:

Restaurants offering online delivery have higher ratings (3.29 vs 2.75).

Table Booking Helps:

Restaurants with table booking have higher ratings (3.48 vs 2.81).

WHAT THE DATA TELLS US

Growth Opportunity:

The rebound in restaurant openings shows a positive trend. Continued expansion in high-potential regions can drive market share.

Customer Satisfaction Gap:

Moderate average ratings highlight the need to improve food quality, service & overall dining experience.

Cuisine & Preference Alignment:

Focus on top-performing cuisines like North Indian, Chinese & Fast Food while experimenting with trending options.

Regional Focus:

Learn from high-performing countries and implement best practices in India to improve ratings.

Service Enhancements Drive Ratings:

Online delivery and table booking significantly impact customer satisfaction.

Price vs Value Perception:

Average cost for two is moderate; ensuring value for money can boost ratings further.

STRATEGIC RECOMMENDATIONS

1

Focus on High-Potential Regions

Expand in markets with higher ratings and adapt successful strategies to underperforming regions.

2

Improve Customer Experience

Enhance food quality, service standards, and ambience to improve overall ratings.

3

Leverage Popular Cuisines

Strengthen North Indian, Chinese & Fast Food offerings and promote them strategically.

4

Boost Delivery Excellence

Invest in faster delivery, better packaging & real-time tracking to increase satisfaction.

5

Promote Table Booking

Encourage more restaurants to offer table booking for a better dining experience.

6

Strengthen Value Proposition

Balance pricing with quality to improve value perception and customer loyalty.

OVERALL IMPACT

✓ Data-driven strategies will improve customer satisfaction and ratings.

✓ Operational improvements will drive growth and profitability.

✓ Better customer experience will increase loyalty and engagement.

✓ Smart expansion will strengthen Zomato's market position globally.

✓ Sustainable growth through insights, innovation & customer centricity.

“

By leveraging data insights and strategic actions, Zomato can enhance customer experience, expand smartly, and build a stronger, more profitable future.

”
